EXPERIENCE

eCommerce Project / 2019 - 2019

As my final year project I've created an ecommerce
website which comercialices mobile phones.

This site counts with a signup/login system,
a CRUD, a great variety of filters, and a smart tool
for recommending products to the clients based
on their answers to a couple of questions.

This project was also made as a mobile app using
Phonegap and a REST API conected to the main
database.

I am also developing a ReactJS app for this same
site.

Developed with PHP, MySQL, ReactJS, JS vanilla,
JQuery, Phonegap y Bulma CSS.
